Systems & Identity: Windows Server 2019/2022, Active Directory, Group Policy, Windows, Linux (Ubuntu/CentOS)

Networking: TCP/IP, DNS, DHCP, VLANs, NAT, ACLs, Cisco IOS, Network Troubleshooting

Cloud: AWS (EC2, S3, IAM, VPC), Microsoft Azure

Virtualisation: Hyper-V, VirtualBox

Hardware & Procurement: Laptop Preparation, Device Deployment, Hardware & Peripheral Procurement, Hardware Troubleshooting, Equipment Setup

Scripting & Tools: PowerShell, Bash, Git

PROFESSIONAL EXPERIENCE

Warehouse Supervisor / IT Support | Sydney | 2022 – Present

Provide day-to-day warehouse supervision while also serving as a primary onsite contact for IT support, hardware and technology-related issues. Work directly with staff and a third-party IT provider to troubleshoot issues, coordinate technical support and ensure workplace technology is available and operational.

- Provide **Level 1 onsite technical support** for desktop, printer, Microsoft 365 and network connectivity issues in a fast-paced working environment.
- Log, prioritise and follow up support requests through the ticketing process, working in line with **SLA targets** and operational priorities.
- Troubleshoot basic **DNS, DHCP and network connectivity issues**, resolving issues where possible and escalating more complex problems to the external IT provider.
- Assist staff with day-to-day technical issues and coordinate with the external IT helpdesk when account administration or further configuration is required.
- Prepare laptops and other workplace devices for deployment, including **factory resets, basic configuration and domain connection**.
- Coordinate the physical deployment and handover of laptops and IT equipment to staff, working with the third-party IT provider to complete remote configuration and setup.
- Act as a key internal contact between staff and the **third-party IT helpdesk**, providing relevant information, coordinating access to equipment and following up outstanding technical issues.
- Communicate technical issues and solutions clearly to staff with different levels of technical knowledge, helping users understand and resolve problems with minimal disruption.
- Support Microsoft 365 applications including **Outlook and Teams** for staff experiencing day-to-day technical issues.
- Procure a range of **IT hardware and peripherals**, researching suitable equipment and coordinating purchases based on operational requirements.
- Assist with the selection of workplace technology including **laptops, monitors, keyboards, mice, printers and other peripherals**.
- Coordinate equipment availability and deployment to support staff requirements and minimise operational downtime.
- Balance competing operational and IT priorities in a high-pressure environment, responding quickly to issues that may affect business operations.
- Escalate technical issues to senior engineers, external vendors and the third-party IT helpdesk when they fall outside the scope of onsite support.

IT PROJECT EXPERIENCE — TAFE NSW

Active Directory & Windows Server

- Configured and managed **Active Directory** environments including users, groups and Group Policy.
- Practised user account administration, access permissions and Group Policy configuration in Windows Server lab environments.
- Worked with **Windows Server 2019/2022** environments and performed practical troubleshooting of system and user issues.

Networking & Infrastructure

- Built and troubleshot networks using **DHCP, DNS, VLANs and routing**.
- Configured and tested network services and connectivity in practical lab environments.
- Deployed and tested **VPN and remote-access solutions** using Windows Server.
- Troubleshot simulated user, system and network support scenarios.

Cloud & Virtualisation

- Completed practical **AWS cloud configuration and troubleshooting** exercises using services including EC2, S3, IAM and VPC.
- Worked with virtualised environments using **Hyper-V and VirtualBox**.
- Applied networking and security concepts within cloud and virtualised environments.

AWARDS & ACHIEVEMENTS

WorldSkills Australia — AWS Cloud Skills Challenge

National Finalist — 4th in Australia

- Ranked **4th nationally** in the AWS Cloud Skills Challenge.
- Designed and deployed AWS infrastructure under strict time constraints using both CLI and GUI tools.
- Configured cloud networking, security groups and AWS services while troubleshooting issues under competition conditions.

WorldSkills NSW Regional Cloud Competition

Finalist

- Placed in the top tier of **30+ participants** by demonstrating AWS design, configuration and troubleshooting skills.
