- **Systems & OS:** Windows Server (2019/2022), Active Directory, Linux (Ubuntu/CentOS)
- **End-User Support:** Microsoft 365 (Outlook, Teams), User Account Management, Password Resets, Remote Support
- **Tools:** PowerShell, Bash, Git, Ticketing Systems, SLA Management
- **Virtualisation:** VirtualBox, Hyper-V

IT & OPERATIONAL WORK EXPERIENCE

Warehouse Supervisor & IT Support (Hybrid Role) | Sydney | 2022 - *Present*

Role Context: Formally stepped into an ad-hoc desktop and network support capacity alongside primary operational duties to resolve technical issues company-wide. Serve as a key resource for stakeholders by offering technical knowledge to guide decisions, while acting as the primary internal interface to streamline the flow of information and accelerate troubleshooting with our 3rd party IT help desk.

- Concurrently manage daily warehouse operations while serving as the primary on-site technical contact, handling IT support duties on an ad-hoc basis as issues arise.
- Provide Level 1 technical support for desktop, printer, and network connectivity issues (DNS, DHCP) in a fast-paced environment.
- Communicate technical solutions clearly to non-technical staff to minimize operational downtime.
- Manage Active Directory user accounts, including password resets, access provisioning, and group permissions.
- Log, prioritize, and resolve support requests using a ticketing system in line with SLA targets.

- Support Microsoft 365 applications, including Outlook and Teams, for local and remote end users.
- Assist with user onboarding and offboarding, including account setup and system access configuration.
- Escalate complex technical issues to senior engineers and external vendors as required.
- Supervise warehouse staff and resolve fast-paced operational challenges under pressure.

PROJECT EXPERIENCE (TAFE Labs)

- Configured and managed Active Directory environments including users, groups, and Group Policy.
- Built and troubleshooted networks using DHCP, DNS, VLANs, and routing.
- Deployed and tested VPN and remote access solutions using Windows Server.
- Simulated real-world IT support scenarios including troubleshooting user, system, and network issues.

AWARDS & ACHIEVEMENTS

WorldSkills Australia - AWS Cloud Skills Challenge | *National Finalist (4th in Australia)*

- Competed at a national level, deploying complex AWS infrastructure using both CLI and GUI under strict time constraints.
- Configured secure networking, security groups, and cloud services for enterprise-scale simulations.

WorldSkills NSW Regional Cloud Competition | *Finalist*

- Placed in the top tier of 30+ participants by demonstrating superior AWS design and troubleshooting abilities.

EDUCATION

- **Diploma of IT (Cloud and Advanced Networking)** | TAFE NSW | 2025
- **Certificate IV in IT (Networking)** | TAFE NSW | 2024
- **Certificate III in IT (Networking)** | TAFE NSW | 2024
